

COVID-19 ISOLATION WORKFLOW

You've tested positive for COVID-19. NOW WHAT?

IF YOU TEST POSITIVE FOR COVID-19:

- Monitor your symptoms and seek emergency medical care immediately if you have any emergency warning signs (including trouble breathing)
- Stay in a separate room from other household members, if possible
- Use a separate bathroom, if possible
- Avoid contact with other members of the household and pets
- Don't share personal household items, like cups, towels, and utensils
- Wear a mask when around other people, if able

Are you
SYMPTOMATIC?

YES

IMMUNOCOMPROMISED INDIVIDUALS

Please refer to the [CDC website](#) for the most up-to-date information.

NO

YOU CAN BE AROUND OTHERS AFTER:

- 10 days since symptoms first appeared and
- 24 hours with no fever without the use of fever-reducing medications and
- Other symptoms are improving (Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation)

- If you continue to have no symptoms, you can be with others after 10 days since your positive COVID-19 test
- If you develop symptoms after testing positive, follow guidance to the left for symptomatic individuals
