You’ve tested positive for COVID-19. NOW WHAT?

IF YOU TEST POSITIVE FOR COVID-19:
- Monitor your symptoms and seek emergency medical care immediately if you have any emergency warning signs (including trouble breathing)
- Stay in a separate room from other household members, if possible
- Use a separate bathroom, if possible
- Avoid contact with other members of the household and pets
- Don’t share personal household items, like cups, towels, and utensils
- Wear a mask when around other people, if able

Are you SYMPTOMATIC?

IMMUNOCOMPROMISED INDIVIDUALS
Please refer to the CDC website for the most up-to-date information.

YES

YOU CAN BE AROUND OTHERS AFTER:
- 10 days since symptoms first appeared and
- 24 hours with no fever without the use of fever-reducing medications and
- Other symptoms are improving (Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation)

NO

If you continue to have no symptoms, you can be with others after 10 days since your positive COVID-19 test
- If you develop symptoms after testing positive, follow guidance to the left for symptomatic individuals
