

# COVID-19 QUARANTINE WORKFLOW

## You've been in close contact\* with someone who tested positive for COVID-19. NOW WHAT?

\*Less than 6' for 15 cumulative minutes or more in a 24-hour period

In periods of moderate to high community transmission of COVID-19, you may come in contact with someone who is COVID-19 positive on a daily basis. It is hard to understand level of contact in many situations including in classrooms, workplace, and social settings. To provide the best protection in all of these situations, we strongly recommend masking in indoor settings, getting vaccinated for COVID-19, staying home when you are sick, and frequent handwashing.
